| 12 | What are the objectives of Monetary Policy? | The objectives of Monetary Policy are: 1. To maintain price stability, 2. To promote growth, 3. To reduce unemployment, 4. To maintain financial stability. | 2 |
| 13 | Explain the 'Money Multiplier'. | The Money Multiplier is a measure of the change in the money supply that results from a change in the base money. It is calculated as the ratio of the money supply to the base money. | 2 |
| 14 | What is the 'Open Market Operation'? | Open Market Operation is the central bank's purchase and sale of government securities in the open market to influence the money supply. | 2 |
| 15 | Define 'Exchange Rate'. | Exchange Rate is the price of one unit of a foreign currency in terms of the domestic currency. | 2 |
| 16 | What are the factors that influence the exchange rate? | The factors that influence the exchange rate are: 1. Interest Rate Differential, 2. Inflation Differential, 3. Trade Balance, 4. Speculation. | 2 |
| 17 | Explain the 'Balance of Payments'. | The Balance of Payments is a record of all economic transactions between a country and the rest of the world. It is divided into the Current Account and the Capital Account. | 2 |
| 18 | What is the 'Current Account'? | The Current Account is the part of the Balance of Payments that records the trade in goods and services, and the transfer of income. | 2 |
| 19 | What is the 'Capital Account'? | The Capital Account is the part of the Balance of Payments that records the trade in capital goods and financial assets. | 2 |
| 20 | Define 'Trade Balance'. | Trade Balance is the difference between the value of exports and the value of imports of goods. | 2 |
| 21 | What are the causes of a trade deficit? | The causes of a trade deficit are: 1. Overvalued Exchange Rate, 2. High Domestic Demand, 3. High Domestic Production Costs. | 2 |
| 22 | Explain the 'J-curve Effect'. | The J-curve Effect is the short-run response of the trade balance to a depreciation of the domestic currency. It shows that the trade balance initially worsens before it improves. | 2 |
| 23 | Define 'Exchange Rate Parity'. | Exchange Rate Parity is the theory that the exchange rate between two currencies should be equal to the ratio of their price levels. | 2 |
| 24 | What are the types of Exchange Rate Parity? | The types of Exchange Rate Parity are: 1. Purchasing Power Parity, 2. Interest Rate Parity, 3. Gold Standard Parity. | 2 |
| 25 | Explain the 'Law of One Price'. | The Law of One Price is the theory that the price of a single good should be the same in all markets. | 2 |
| 26 | What is the 'Law of One Price'? | The Law of One Price is the theory that the price of a single good should be the same in all markets. | 2 |
| 27 | Define 'Real Exchange Rate'. | Real Exchange Rate is the exchange rate adjusted for the price level in each country. | 2 |
| 28 | What are the factors that influence the real exchange rate? | The factors that influence the real exchange rate are: 1. Relative Inflation, 2. Relative Income, 3. Relative Technology. | 2 |
| 29 | Explain the 'Real Business Cycle Model'. | The Real Business Cycle Model is a macroeconomic model that shows the relationship between the real exchange rate and the level of output. It is based on the theory of rational expectations. | 2 |
| 30 | What is the 'Real Business Cycle Model'? | The Real Business Cycle Model is a macroeconomic model that shows the relationship between the real exchange rate and the level of output. It is based on the theory of rational expectations. | 2 |
